

# All-weather mat over the tunnel

57A 061 580

ŠKODA KAROQ (NU)

**Material:** Plastic

**Color:** Black

## Practical accessory | Protection | Resistance | Quality

24 hours a day, 365 days a year, your ŠKODA KAROQ is always prepared to hit the road, regardless of the season and weather. However, in bad weather the car's interior may get soiled with impurities trapped on the car occupants' clothes and shoes. While the all-weather interior mats prevent impurities from getting to the floor, this all-weather tunnel mat made of high-quality thermoplastic elastomers **protects the centre tunnel against impurities** (such as dust, sand, gravel, mud, water, snow, etc.) trapped on the rear-seat passengers' shoes. Owing to its unique shape, the mat **perfectly copies the profile of the centre tunnel** while maintaining its original look for a long time. Moreover, the mat can be taken out easily and cleaned using ordinary detergents. Stringent material-strain lab tests and long-term road tests have proven the **mat's high resistance to mechanical strain in both dry and wet conditions**. The all-weather anti-slip tunnel mat will surely become an indispensable, practical accessory to your vehicle.

The mat can be used correctly **exclusively in combination with rear all-year mats** from the ŠKODA Genuine Accessories portfolio. When installing the mats, the tunnel mat is installed first, the rear all-weather mats come next. Products not in use should be stored in locations not exposed to direct sunshine. Objects placed and/or stored on the mat might deform it.
